

**CRYSTALLINE
FLOOR PIECE / RED****2009****The Knight's Tour, a con-
temporary sculpture show,
Museum De Hallen,
Haarlem, NL**

A hand knitted radiant red floor piece with the geometric structure of a faceted crystal is transformed into a blanket charged with the suggestion of spiritual function. This floor piece shows the same motif as *Inside the mind a resting place* which is also a mental structure.

Behind the crystalline floor piece hangs an arc-shaped mobile finished with brass and silicone human teeth which becomes a portal that may offer access to a parallel world.
